A) Specifications

1. Background

- 1.1 Hillsborough County is approximately 1,020 square miles of land mass adjacent to Pasco, Pinellas, Polk and Manatee counties, and surrounded by the waters of Tampa Bay and the Gulf of Mexico. Hillsborough County has 39.2 miles of shoreline and includes portions of the Courtney Campbell Causeway, Howard Franklin Bridge, Skyway Bridge and the island of Egmont Key in the Gulf of Mexico.
- 1.2 Historically, Hillsborough County's digital aerial imagery acquisitions (including both ortho and oblique photography) have occurred every other year during December and January (as atmospheric conditions permit), with final product deliverable occurring no later than 90 days from the original data acquisition. The HCPA is now seeking to increase the number of annual ortho imagery captures to ~~three~~ one per year and capture oblique imagery at least once per year, as well as shorten the final product delivery time to no later than 30 days from data acquisition.

2. Purpose

- 2.1 The purpose of this competitive process is to ensure Hillsborough County Property Appraiser compliance with Section 287.055 Florida Statutes known as the "Consultants' Competitive Negotiation Act" (CCNA). The CCNA establishes contracting procedures by which counties must select architects, professional engineers, landscape architects, and surveyors and mappers ("Professional Firms") for architectural, engineering, landscaping and mapping services ("Professional Services"). The CCNA process allows for professional firms to be chosen on quality of personnel, minority business enterprise consideration, past performance, willingness to meet time and budget requirements, location, workload, and volume of work previously awarded to each Professional Firm by the HCPA.

3. Objective

- 3.1 The HCPA and Hillsborough County are seeking qualified consultants to provide the HCPA and Hillsborough County with high-resolution aerial photography (Ortho- and Oblique) services. The services will be used to enhance mapping systems and improve related applications for the HCPA.

4. Scope Of Work

- 4.1 The HCPA will use these services for the purposes of land records management, infrastructure management, engineering pre-design, map production, GIS activities, real estate and tangible property valuation and various land and environmental analysis. In order to meet the suitability requirements for these applications, it is necessary that the products be to the accuracy and precision outlined in the specifications contained herein and adhere to all applicable Florida Statutes. According to section 193.023, Florida Statutes, the Florida Department of Revenue (FDOR) shall establish minimum standards for the use of image technology consistent with standards developed by professionally recognized sources for mass appraisal of real property. The FDOR states that orthophotos are a type of survey as defined in Chapter 472, Florida Statutes, Professional Surveying and Mapping. Therefore, the procurement of professional services to create orthophotos

must be in compliance with section 287.055, Florida Statutes, and all work performed for this project must be in compliance with the Minimum Technical Standards, Rule Chapter 5J-17, Florida Administrative Code, pursuant to Chapter 472. Where applicable, all mapping and data collection work will be done in accordance with Chapter 472, F.S., Professional Survey and Mapping. - 4.3 Work to be performed by the consultant shall be on an assignment-by-assignment basis. Work assignments (Work Orders) shall be made by the HCPA project manager or designee. Prior to any work assignments being made, based on mutual discussions between the HCPA and the consultant, the consultant shall be required to prepare a detailed scope of work and schedule for the assignment which shall include a not to exceed budget amount for the assignment. The consultant shall not perform work under the contract without written authorization from the HCPA. The consultant shall waive any claim for compensation for any work performed without written authorization
- 4.4 It is the intent of the HCPA to develop master agreements to be executed by selected firm(s) and to establish a contract purchase order with a value ceiling designated by the HCPA over the initial contract term from which individual work assignment will be issued. There is no guarantee, expressed or implied; that a selected firm will receive a work assignment or that the work assignment(s) will aggregate this amount.
- 4.5 The delivered ortho and oblique photography shall integrate seamlessly with the HCPA's desktop appraisal software (GeoViewPort by iLookabout) and the HCPA's Computer Assisted Mass Appraisal (CAMA) software (Custom CAMA by Thomson Reuters).
- 4.6 The HCPA will request a scope of work from the selected firm(s) and negotiate a scope of work and fee for the proposed services for a particular work assignment under the terms of the Master Agreement.

 - 10.9 Require the Form I-9 and E-Verify process to be conducted only by individuals who have received appropriate training and include a secondary review as part of each employee's verification to minimize the potential for a single individual to subvert the process.
 - 10.10 Arrange for annual Form I-9 audits by an external auditing firm or a trained employee not otherwise involved in the Form I-9 process.
 - 10.11 Establish a procedure to report to ICE credible information of suspected criminal misconduct in the employment eligibility verification process.

Encourage contractors to incorporate the IMAGE Best Practices contained in this paragraph and, when practicable, incorporate the verification requirements in Subcontractor agreements.
